

Standard Query Language (SQL) Introductrion

Multiple sublanguages

DQL	Data Query Language	Query data
DML	Data Manipulation Language	Modify data
DDL	Data Definition Language	Modify tables, …
TCL	Transaction Control Language	Create transactions
DCL	Data Control Language	Control user access
Procedural language		Functions

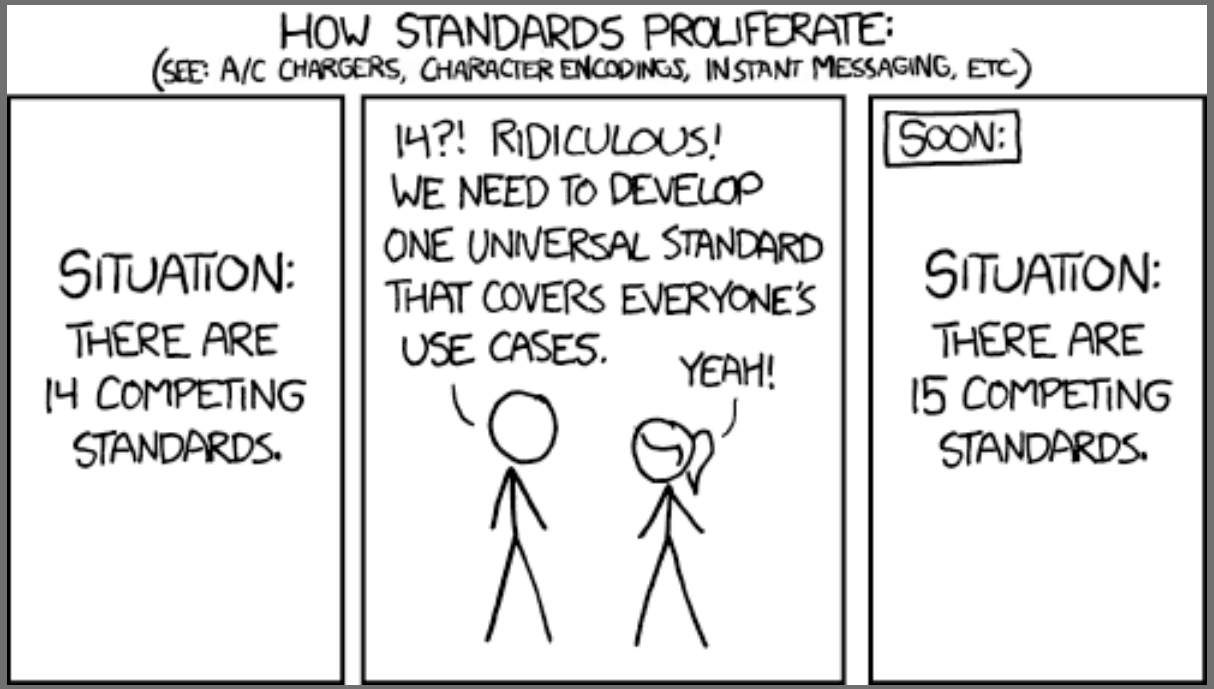

Many “standards”

- Official: SQL:2016
- Each product has its own subset & extensions.
- Large variation in procedural languages.

We’ll cover a mostly-standard subset.

Many “standards”

https://xkcd.com/927/

Why do I use PostgreSQL?

- Free!
- Mostly standards-compliant
- Much better procedural language
