ERD Implementation Basics: Other Elements

Person(ssn, name, street, city, state)

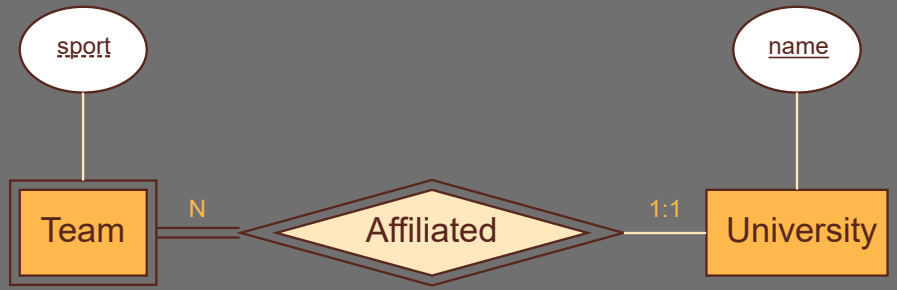

OR

Person(ssn, name, address_street, address_city, address_state)

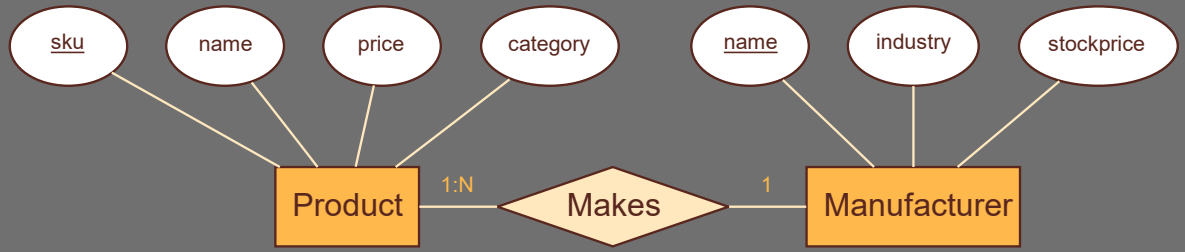

Team(name, sport, city_name)

City(name)

Team(sport, univ_name)

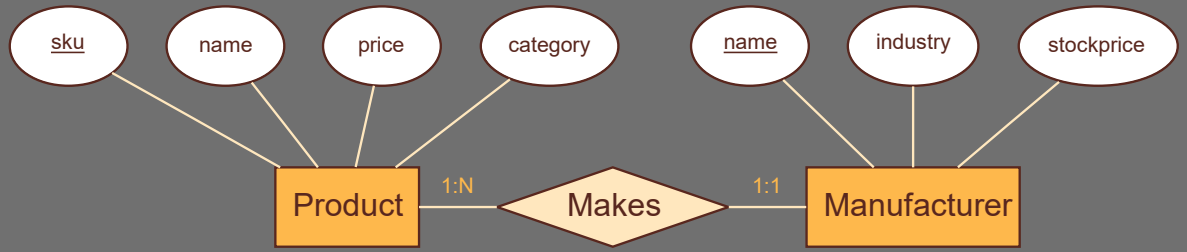

University(name)

Can’t easily implement this minimum cardinality.

Options:

- Treat 1:N as 0:N.
- (Some DBs) INSERT ALL

Same problem as before. Plus, chicken-and-egg problem!

Options:

- Treat 1:N as 0:N.
- (Some DBs) INSERT ALL

Associative entity sets

Same as any other many-many relationship.
