Example of Query Plan Cost

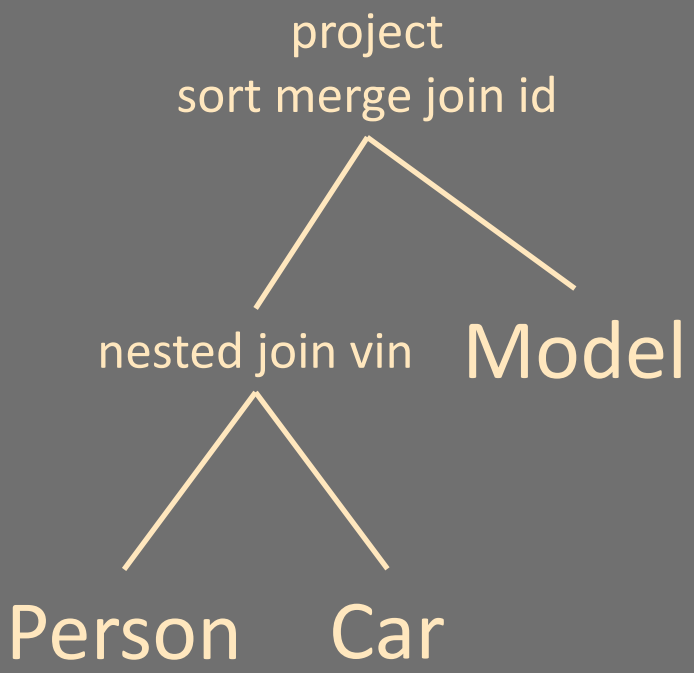

Example

```
SELECT p.first_name,
       p.last_name,
       m.company
FROM Person AS p
INNER JOIN Car AS c
    ON p.car_vin = c.vin
INNER JOIN Model AS m
    ON c.model_id = m.id;
```

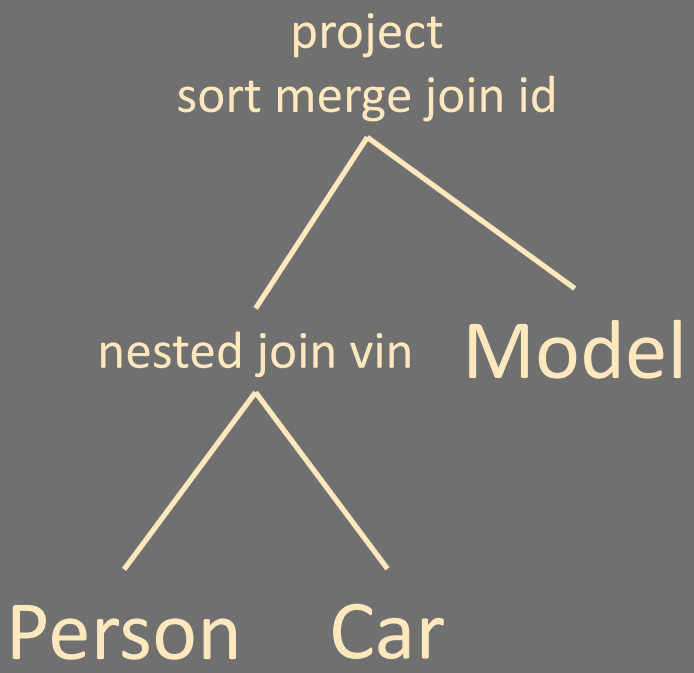

Size Estimation

$T(XY) = T(X)$, if joining on FK from X to Y

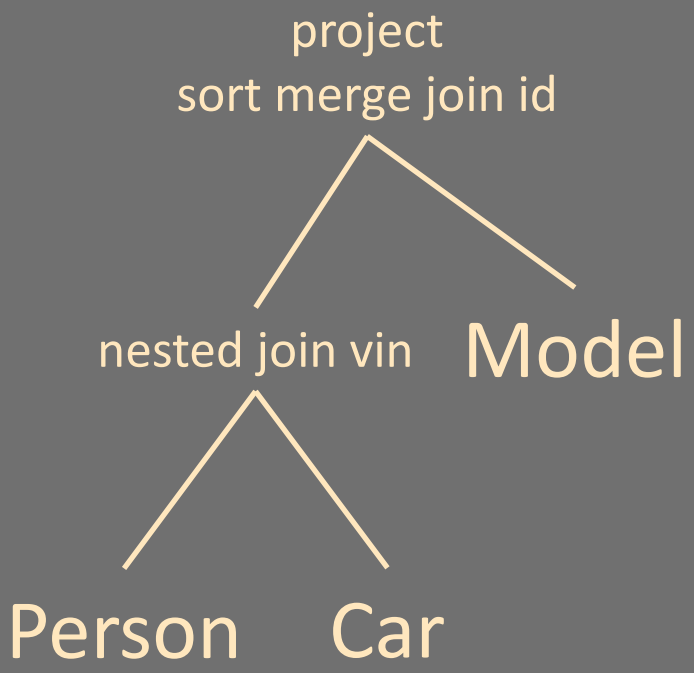

Size Estimation

$$B(XY) = \left(\frac{B(X)}{T(X)} + \frac{B(Y)}{T(Y)}\right) T(XY)$$
