Relation vs. Table

Relation

- Part of the model
- No duplicates (set)
- Unordered

Table

- Part of the implementation
- Allows duplicates (multiset)
- Allows ordering

Mathematical Definition

Relation $R(a, b, \ldots, z) \subseteq A \times B \times \cdots \times Z$

where $a \in A, b \in B, \ldots, z \in Z$

Set of tuples for which the relation is *true*.
