Binding Forms:
Selecting Which To Use

Avoiding duplicating subquery?

- In one SELECT? – Use WITH.
- In multiple SELECTS? – Use TEMP TABLE.

- But see if VIEW or MATERIALIZED VIEW is more efficient in this case.

Staging subqueries for readability?

- In one SELECT? – Use WITH.
- In multiple SELECTS? – Use TEMP TABLE.

- But see if inlining subquery is more efficient in this case.

Need an alternate view of data?

- See which of VIEW or MATERIALIZED VIEW is more efficient in this case.

Summary

WITH (CTE)	Temp table	View	M'ized view
Defined in scope of WITH … SELECT …	Defined for current session	Defined until dropped	Defined until dropped
Implementation varies	Results stored	Query stored	Query & results stored
		Query reevaluated when needed	Query reevaluated periodically

More about efficiency in next course module.
