Neo4J Design

What is a Neo4J design?

- Node types & properties
- Relation types & properties

Design from scratch

Nodes ≈ nouns

Relations ≈ verbs

Design from ERD

- Entity set → node type
- Relation → relationship type
  - Must break up 2+-arity relations
  - Associative entity set → ?
- Eliminate sub/superclasses.
  - Implement all entity sets or simplify?
  - Option: Subclassing → relationship type
  - Option: Hierarchy → one node type. Properties indicate subclass.
